Abstraksi :

Poorness represent complex problem, because not even with reference to lowering of earnings and mount consumption socialize, but also go together to lowering mount education and health. To the number of member of impecunious domestic having habit medicinize if there is ill and to the number of problem of medication defrayal, representing indication that still a lot of impecunious family requiring help of health in program of JPS of Health Area. Intention of this erudite writing is to know impact of governmental program of JPS of Area of Health by using method of research with indicator of poorness reduction (Proverty Reduction = PR). To obtain get accurate data and objective, writer use method of research of field covering observation and interview and also analyse data using method indicator of reduction poorness for the impecunious resident and for allocation and realization of fund of JPS of Health Area. Pursuant to calculation result which have been done inferential hence that have been happened the budget allocation degradation of equal to 28,4 gratuity because of decreasing it sum up impecunious resident equal to 79,7 fund and gratuity accepted a aid receiver have really accepted by a fund JPS Health Area aid receiver. So that the execution Program Social Peacemaker Net of Health Area have succeeded and zero in on.
